ABOUT THE ZOOM

The Zoom is a multifunctional spotlight suitable for every industry, bringing together a range of functionalities. The spotlight is DALI Dim to Dark and supports Tunable White, allowing for complete dimming within a color range of 1800 to 4000 Kelvin.

The Zoom gets its name from the ultra-small, adjustable lens that enables zooming in and out, making it easy to adjust the light beam without having to completely change the arrangement of the spots. The spotlight is designed to be versatile but intentionally kept as compact as possible, thanks to a special LED driver.

The Ocab Zoom comes with a matching slim 48V track rail. The spotlight features a housing made of high-quality anodized aluminum, which can be coated in any RAL color.
